

TOURTALK

LANGUAGE INTERPRETATION SYSTEMS

A Tourtalk language interpretation system can be set-up within minutes of arriving at a venue.

The system can accommodate up to twenty different interpreters (languages).

As it is wireless, it requires no installation and can be used indoors and outdoors.

The Tourtalk TT 100-SI23M is a complete language interpretation system comprising 2 transmitters with headband microphone (for the interpreters), 23 receivers with earphones (for the delegates) and a charger transport case.

Examples of use

International Travel

Mobile Interpretation for Foreign Guests

Multi-Language Conferences

How it works

The Transmitter

Each transmitter features an integrated microphone, microphone socket (to connect the headband microphone), and microphone mute switch. An aux-in socket to enable the connection of a interpreters desk is also provided.

The interpreters can speak at a comfortable level or even whisper, without the need of a translation booth.

The Receivers

The receivers feature a headphone socket to connect the single earphone. The delegates can adjust their own volume to a comfortable level.

A wide range of accessories are available for the Tourtalk system to suit many applications. For more information please visit the website.

TT 100-SIC13M

Tourtalk TT 100 systems are also used for:
