

TOURTALK TT 300

GROUP COMMUNICATION SYSTEM

The perfect solution for a wide range of applications when secure, reliable, hands-free, full-duplex communication is required.

Stop competing with distance or noise and ensure you can hear and be heard.

Tourtalk is a digital wireless system that enables open conversation with unrestricted movement. Up to six users can speak simultaneously with an unlimited number of users listening per group.

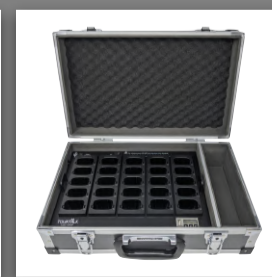

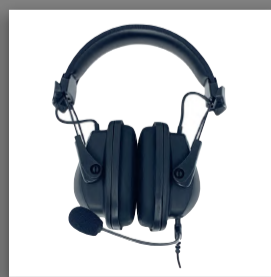

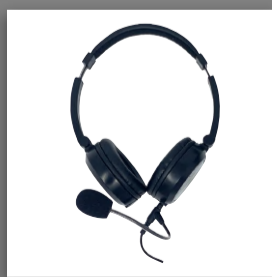

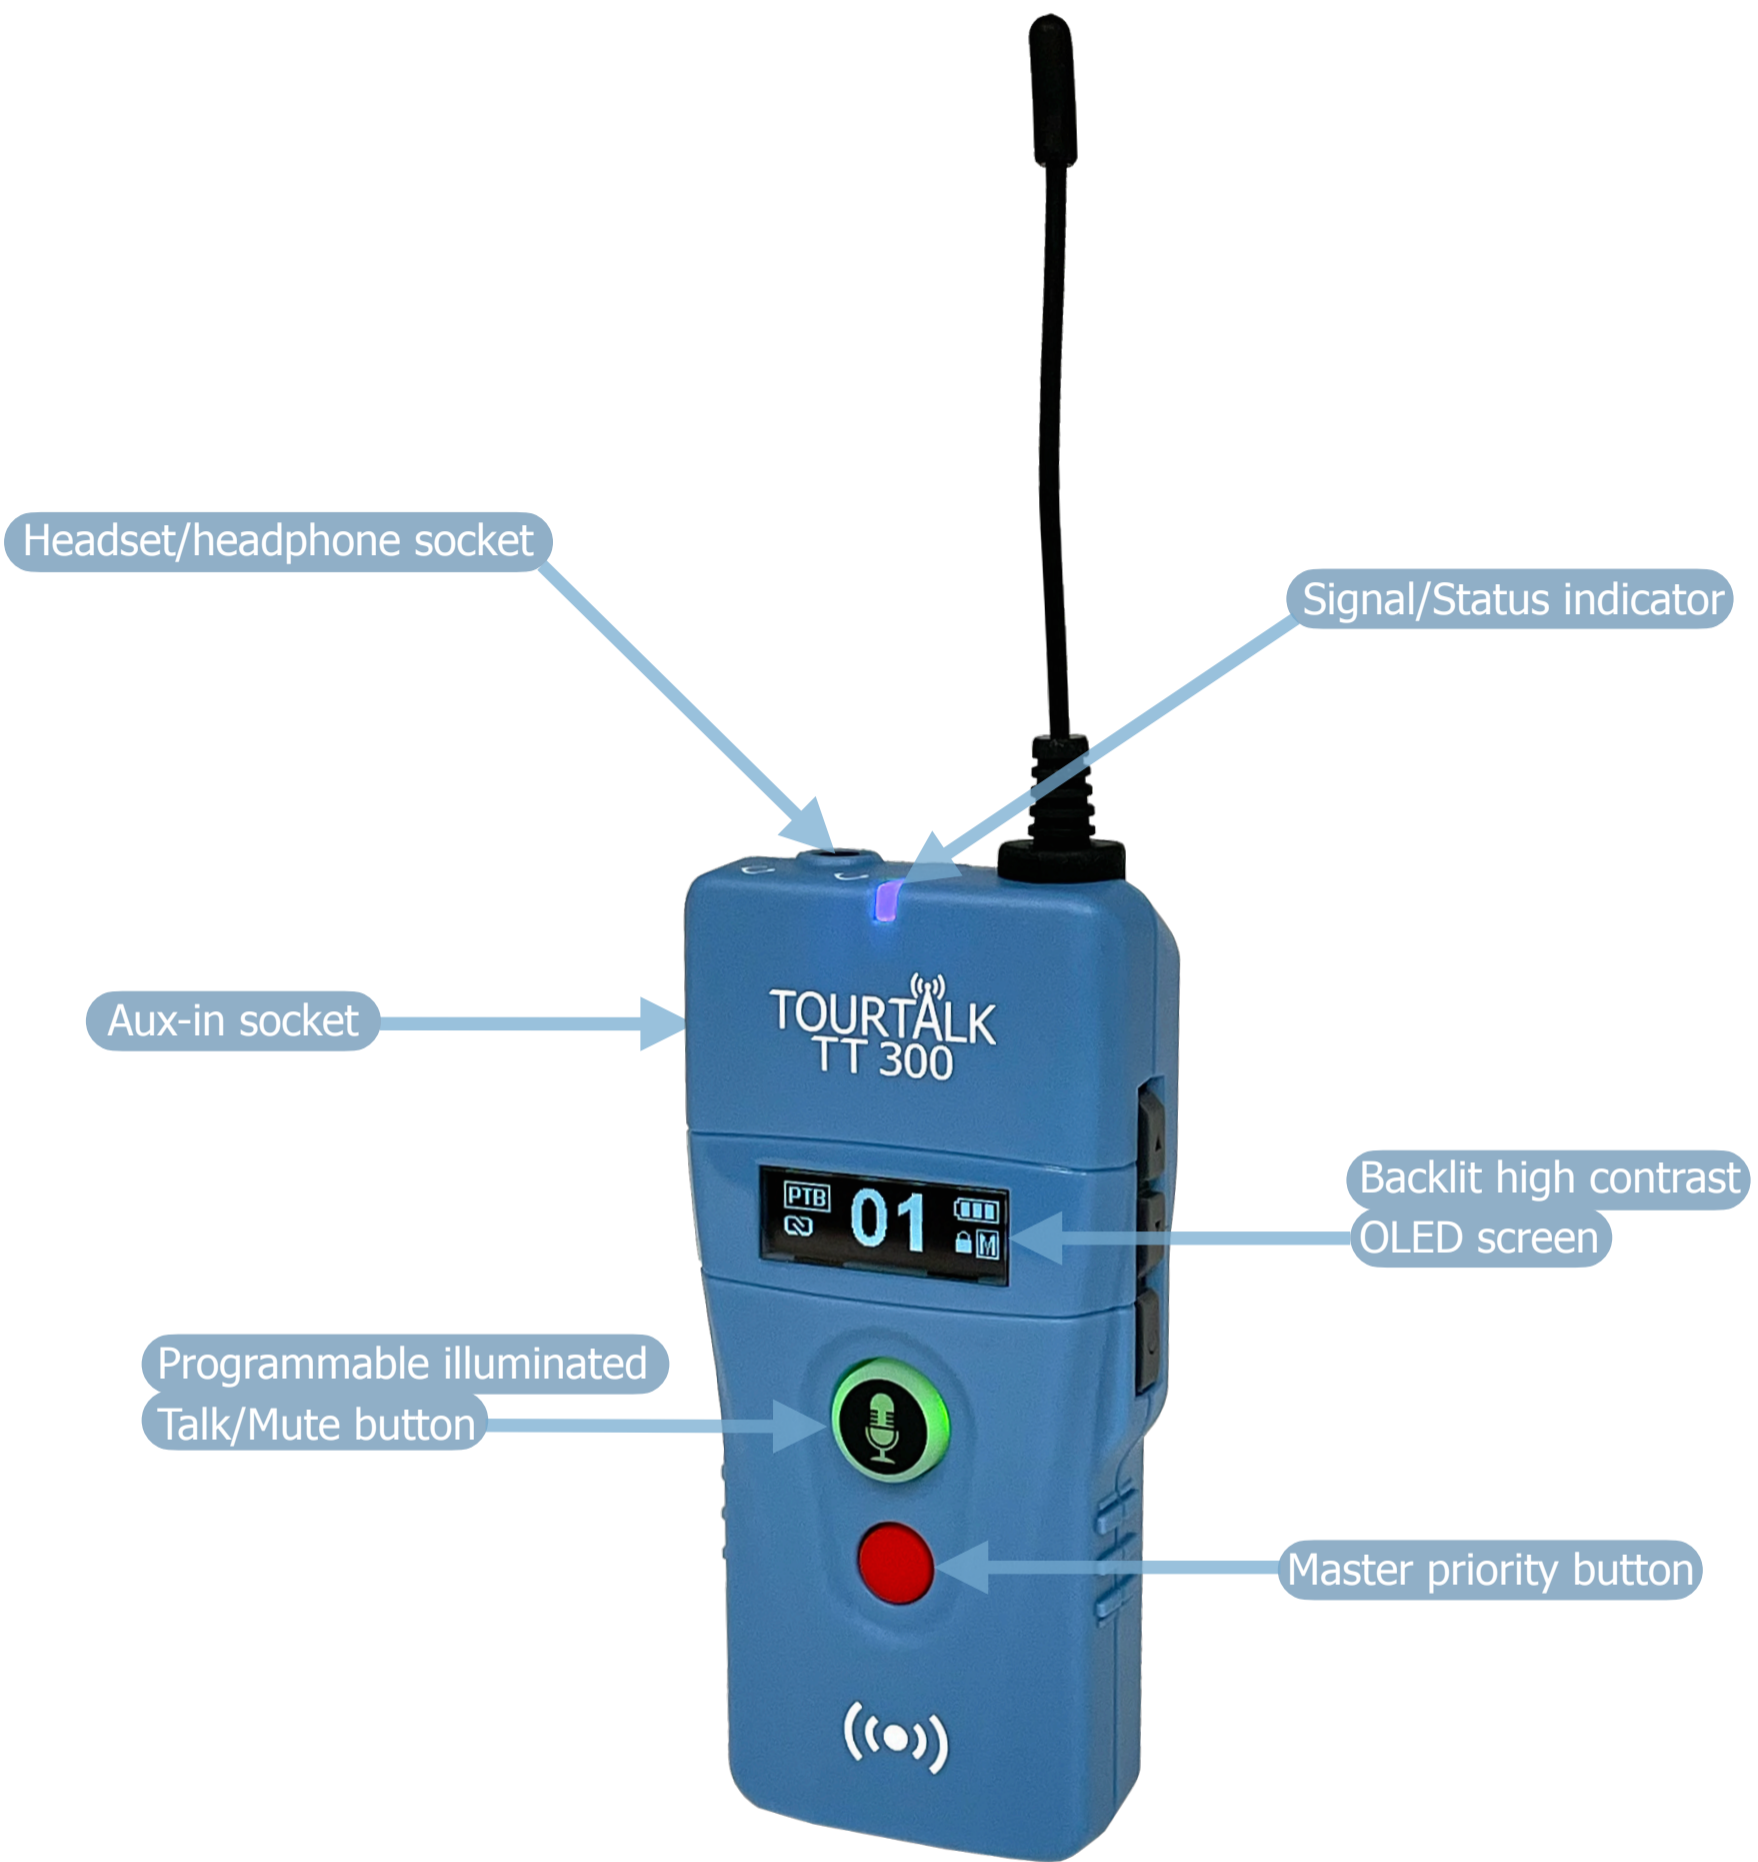

Flexible - Any transceiver can be set-up as a Master, Sub-Master or Listen Only unit.

Control - Master unit priority function to interrupt at any time to control the proceedings.

Secure - Selectable encryption for private discussions.

Wireless - No base station so the system can be used indoors and outdoors.

TT 300 Transceiver

A wide range of headsets, chargers and accessories are available to suit any environment.
