

AXIWI Referee Communication System - Quick Guide

V1216

This is a quick guide only. For more information please download the user manual from:

<https://soundinduction.co.uk/referee-communication-systems.html>

Please ensure all units are charged before the match.

Each unit can be setup as a 'Master' or as a 'Follower'.

For full-duplex (two-way) communication there must be one Master (there can only be one per channel) and at least one follower.

Connect the appropriate headset to the 3.5mm jack socket on the top of each unit.

The Referee must have their unit setup as a 'Master'. All assistant Referees/other officials must have their units setup as 'Followers'.

'Master' Unit setup

The Referee's 'Master' unit must be switched on first and off last.

Power on by pressing the on/off button (whilst holding down the volume up button) for 3 seconds. One LED will illuminate and stay on. This indicates that this unit is now setup as a 'Master'. The colour of the LED will indicate the channel.

The channel can be changed by pressing the 'S' Speak button (whilst holding down the volume up button).

Power off by pressing the on/off button for 2 seconds.

In normal operation the 'Master' unit's headset microphone is always live. The microphone can be muted by pressing the 'S' button for 3 seconds (1 beep will be heard through the headset). The microphone can be restored by pressing the 'S' button again, for 3 seconds (2 beeps will be heard through the headset).

The Referee may deactivate the speaking ability of all other 'Followers' by pressing the volume down button for 2 seconds (2 beeps will be heard through the headset). The 'Followers' speaking ability can be restored by pressing the volume down button again, for 2 seconds (1 beep will be heard through the headset).

'Follower' Unit setup

Power on by pressing the on/off button for 2 seconds. One LED will illuminate and flash. This indicates that this unit is setup as a 'Follower'. The colour of the LED will indicate the channel.

The channel can be changed by pressing the 'S' Speak button (whilst holding down the volume up button). The 'Follower' units must be set to the same channel as the Referee's 'Master' unit.

Power off by pressing the on/off button for 2 seconds.

In normal operation the 'Follower' unit's headset microphone is not live. The microphone can be un-muted, by pressing the 'S' button (1 beep will be heard through the headset). To indicate the microphone is live, the LED of the selected channel will continue to flash and the other LEDs will illuminate. If 2 beeps are heard then the Referee has not given 'Follower' units permission to speak. To mute the microphone press the 'S' button again (2 beeps will be heard through the headset).

Up to five units, including the 'Master' (Referee), can be live simultaneously. All 'Follower' units enter the discussion in a first-come-first-basis. i.e. If a sixth 'Follower' microphone becomes live the first 'Follower' to enter the discussion will be disconnected.

A wide range of accessories are available from
