

SOUND INDUCTION SYSTEMS

SENNHEISER 2020-D TOURGUIDE SYSTEM - HIRE RATES

A tourguide system is a lightweight and portable radio system used to aid communication from an individual to a group of people. A typical system comprises a compact microphone transmitter for the presenter and wireless receiver headsets for the listeners.

Tourguide systems are used for:

- Factory and plant tours or in other noisy environments
- Tours in noise sensitive locations e.g. Museums, historical sites indoors and outdoors
- Simultaneous translation for multilingual meetings
- Radio aid system to assist people that are hard of hearing
- Audio description system to assist partially sighted or blind people
- Sport coach training

Sound Induction Systems have a large stock of Sennheiser 2020-D Tourguide systems for hire. Each system is tested, recharged and supplied with easy to follow user instructions, so is ready to use straight out of the box.

					
	Ten Stethoset receivers and one transmitter	Twenty Stethoset receivers and one transmitter	Ten bodypack receivers and one transmitter	Twenty bodypack receivers and one transmitter	Additional transmitter
Per day	£125	£155	£125	£155	£10
3-7 days	£350	£400	£350	£400	£30

Bodypack receivers are supplied with lanyards and either single earphones, dual earphones or neckband headphones. Induction loops (to assist hearing aid wearers) are also available.

Transmitter options

The bodypack transmitter with headband microphone is ideal for hands-free use. It also has an Aux input to enable an mp3 player to feed the system.

The handheld transmitter can be easily be passed between users making it ideal for visitor interaction such as question and answer sessions, interviews, etc.
